

10410LS 642100 高等分子生物學 (Advanced Molecular Biology)

COURSE IDENTIFICATION

生二119: Advanced Molecular Biology

Lecture: Wed 10:10-11:00 and Fri 10:10-12:00

Lecturers: 李佳霖 (JL Lee) 汪宏達 (HD Wang) 林立元 (LY Lin) 張壯榮 (CR Chang)

COURSE DESCRIPTION:

The goal of this course is to develop a thorough understanding of the basic fundamentals to advanced molecular biology both from the perspective of known molecular mechanisms for regulating fundamental processes in a cell, and also from a theoretical applied perspective for using molecular biology as a laboratory tool.

Molecular biology deals with nucleic acids and proteins and how these molecules interact within the cell to promote proper growth, division, and development. It is a large and ever-changing discipline. This course will emphasize the molecular mechanisms of DNA replication, repair, transcription, protein synthesis, and gene regulation in different organisms. In addition, we will take an in-depth look at some rapidly evolving fields, including chromatin structure and function, RNA polymerase dynamics, and regulation of gene expression by different types of RNAs.

TEXTBOOK:

Lewin's GENES XI. ISBN-13: 9781449659851

Author(s):

Jocelyn E. Krebs, PhD, Professor, University of Alaska, Anchorage

Elliott S. Goldstein, PhD, Associate Professor, Arizona State University

Stephen T. Kilpatrick, PhD, Associate Professor, University of Pittsburgh at Johnstown

- Molecular Biology is a rapidly advancing field with a constant flow of new information and cutting-edge developments that impact our lives. Lewin's GENES has long been the essential resource for providing the teaching community with the most modern presentation to this dynamic area of study. GENES XI continues this tradition by introducing the most current data from the field, covering gene structure, sequencing, organization, and expression. It has enlisted a wealth of subject-matter experts, from top institutions, to provide content updates and revisions in

their individual areas of study. A reorganized chapter presentation provides a clear, more student-friendly introduction to course material than ever before. - Updated content throughout to keep pace with this fast-paced field. - Reorganized chapter presentation provides a clear, student-friendly introduction to course material. - Expanded coverage describing the connection between replication and the cell cycle is included, and presents eukaryotes as well as prokaryotes.

ATTENDANCE:

Students are expected to attend all lectures **AND BE ON TIME!** If you are perpetually late to this class it may result in the loss of points. Excuses should be prior to class in order to be accepted. (You can contact lecturers by email)

EXAMS:

There will be three lecture exams.

SYLLABUS

Sep	16	18	JL Lee	Chap 11, 12, 13, 14, 15, 16, 17 and 18 10/09 國慶日補假
	23	25		
		30		
Oct		02		
	07			
	14	16		
Oct	21		HD Wang	Chap 19, 20, 26, 27 and 28 First Exam
		23		
	28	30		
Nov	04	06		
	11	13		
		20	LY Lin	Chap 22, 23, 24 and 25 11/18 全校運動大會(停課一天)
	25	27		
Dec	02	04		
Dec	09		CR Chang	Chap 9, 10, 21, 29 and 30 Second Exam 1/01 元旦放假
		11		
	16	18		
	23	25		
		30		
Jan		01		
	06	08		
		15		Final Exam
