

前沿物理演講二 (科號: 10810PHYS314000)

Undergraduate Physics Colloquium (II) – Fall, 2019

授課老師: 吳國安教授 (物理館 610 室)

Email: kuoan.wu@gmail.com

**提醒:** 修這門課，不需要修過前沿物理演講(一)。

**課程大綱:**

The Undergraduate Colloquium (II) is aimed to introduce cutting-edge physics research areas to undergraduate students, so that students can get a broader view of physics research outside their regular courses. We will invite renowned physicists to share not only their fruitful and exciting research progresses but also their experience and passion to science. In this course, students are expected to explore new topics in physics and to get to know the ideas/motivation behind research. Furthermore, it is a good opportunity for undergraduate students to take a peek at the excitement of the career in physics.

**上課時間:** WaWb (週三, 晚上 6:30 – 8:30)、**教室:** 物理館 019

**評分方式:** To be determined
