Topics to be covered include: morphological typology; word order typology; grammatical relations; case-marking and agreement systems; valency and transitivity; tense, aspect, and mood (TAM); etc.</p> <p>The overall goals are:</p> <ul style="list-style-type: none"> (i) to develop the skills necessary to analyze the structure of language, and (ii) to provide a general training in analytic thought. <p>By the end of the course, students are expected to be able to:</p> <ul style="list-style-type: none"> (i) analyze first-hand field data independently; (ii) recognize the diversity of language systems and their fundamental similarities; (iii) understand and use the basic terminology of linguistic typology. <p>***NO prerequisite is required for this class. However, an interest in language(s) is desirable. Even if you haven't taken "Introduction to Linguistics" before, you are still encouraged to take this course.</p> <p>***This course will be lectured in English.</p> <p>***Chinese translation for technical terms will be provided. 四、教學方式	This course covers various grammatical phenomena

	commonly found in the world's languages through a series of readings, lectures, discussions, and 'hands-on' experience with linguistic analysis. Students are expected to participate in class discussions and take turns in presenting their solutions to practice exercises in class.
